JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Alloy surfaces
Spontaneously organized molecular assembly of an aromatic organic disulfide on silver/platinum alloy surfaces: an angle dependent X-ray photoemission investigation 101
Angular resolving mode
An angular resolving mode for four-element electrostatic lenses 195
Argon
Resonant Auger decay in the $L_{2,3}$-MM spectrum of Ar excited by electron bombardment 203
Aromatic organic disulfide
Spontaneously organized molecular assembly of an aromatic organic disulfide on silver/platinum alloy surfaces: an angle dependent X-ray photoemission investigation 101
ARPES
An angular resolving mode for four-element electrostatic lenses 195
Atomic collision
Penning ionization electron spectroscopy of the C_2H_2 molecule by Ne* (3^3P_2, 3^3P_0) metastable atoms 51
Auger
Resonant Auger decay in the $L_{2,3}$-MM spectrum of Ar excited by electron bombardment 203
Auger electron
An experimental comparison of the total-electron-yield and conversion-electron-yield modes for near-surface characterization using X-ray excitation 81
Auger electron–ion coincidence
State and site selectivity in SF_6 fragmentation studied via Auger electron–ion coincidence 169
Auger parameter
Interface effects and the Auger parameter in titanium oxide thin films deposited on metals and in sandwich structures 61
Auger spectroscopy
Effects of relativity on the $KL_1L_2(^3P_0)$ Auger transition rate of $^{159}_{65}Tb$ 1
Resonant Auger spectra of open shell rubidium atom 253

Calculated densities of states
Electronic structure of intercalated metal disulfide ($Fe_{1/4}TiS_2$) studied by XPS and theoretical calculations 19
Carbon
The electronic structure of different forms of solid carbon studied by electron momentum spectroscopy 231
Carbon nitride film
Nitrogen 1s electron binding energy assignment in carbon nitride thin films with different structures 45
Ceria
Photoelectron spectroscopic study of X-ray induced reduction of CeO_2 121
Conversion electron yield
An experimental comparison of the total-electron-yield and conversion-electron-yield modes for near-surface characterization using X-ray excitation 81
Core peaks
Electronic structure of intercalated metal disulfide ($Fe_{1/4}TiS_2$) studied by XPS and theoretical calculations 19

Dichroism
Influence of photoelectron diffraction effects on the dichroism and spin polarization of non-magnetic surfaces 91
Dissociative photoionization
Kinetic energy study of the ion fragments produced by dissociative photoionization of nitric oxide 109
DV-Xα MO method
Calculation of Al and Si KLV Auger energies and intensities 187

Elastic peak electron spectroscopy
Determination of the inelastic mean free path of electrons in GaAs and InP after surface cleaning by

ion bombardment using elastic peak electron spectroscopy 177
Elastic scattering
Influence of surface oxidation on the photoelectron diffraction intensities from InP single crystals 73
Electron exchange
Resonant electron exchange scattering in late transition metal monoxides 211
Electron momentum spectroscopy
The electronic structure of different forms of solid carbon studied by electron momentum spectroscopy 231
Electron spectroscopy
Penning ionization electron spectroscopy of the C_2H_2 molecule by Ne* (3^3P_2, 3^3P_0) metastable atoms 51
Energy resolved momentum density
The electronic structure of different forms of solid carbon studied by electron momentum spectroscopy 231

Four-element electrostatic lenses
An angular resolving mode for four-element electrostatic lenses 195

HREELS
Resonance mechanisms in electron energy loss spectra of stearic acid Langmuir–Blodgett monolayers revealed by isotopic effects 221
Hydroxyl species and mixed valency
Photoelectron spectroscopic study of X-ray induced reduction of CeO_2 121

Inelastic mean free path
Determination of the inelastic mean free path of electrons in GaAs and InP after surface cleaning by ion bombardment using elastic peak electron spectroscopy 177
Intercalation
Electronic structure of intercalated metal disulfide ($Fe_{1/4}TiS_2$) studied by XPS and theoretical calculations 19
Ion fragment
Kinetic energy study of the ion fragments produced by dissociative photoionization of nitric oxide 109
Isotopic effects
Resonance mechanisms in electron energy loss spectra of stearic acid Langmuir–Blodgett monolayers revealed by isotopic effects 221

Kinetic energy
Kinetic energy study of the ion fragments produced by dissociative photoionization of nitric oxide 109
KLL transitions
Effects of relativity on the $KL_1L_2(^3P_0)$ Auger transition rate of $^{159}_{65}Tb$ 1
KLV Auger spectrum
Calculation of Al and Si KLV Auger energies and intensities 187

Langmuir–Blodgett layers
Resonance mechanisms in electron energy loss spectra of stearic acid Langmuir–Blodgett monolayers revealed by isotopic effects 221
Liquid surface
Molecular reorientation on liquid surfaces: a MIES study of pentadecane segregation in formamide 9
Localized states
Resonant electron exchange scattering in late transition metal monoxides 211

Metastable helium atoms
Molecular reorientation on liquid surfaces: a MIES study of pentadecane segregation in formamide 9
MIES
Molecular reorientation on liquid surfaces: a MIES study of pentadecane segregation in formamide 9
Mo oxide films
Formation of thin oxide and sulphide films on polycrystalline molybdenum foils: characterization by XPS and surface potential variations 31
Mo sulphide films
Formation of thin oxide and sulphide films on polycrystalline molybdenum foils: characterization by XPS and surface potential variations 31
Model catalysts
Formation of thin oxide and sulphide films on polycrystalline molybdenum foils: characterization by XPS and surface potential variations 31
Molecular assembly
Spontaneously organized molecular assembly of an aromatic organic disulfide on silver/platinum alloy surfaces: an angle dependent X-ray photoemission investigation 101
Monte Carlo technique
Escape probability of signal photoelectrons from noncrystalline solids: influence of anisotropy of photoemission 127
Multiply ionized Kβ satellite X-ray spectrum
Calculation of Al and Si KLV Auger energies and intensities 187

N 1s binding energy
Nitrogen 1s electron binding energy assignment in carbon nitride thin films with different structures 45

Neon metastable
Penning ionization electron spectroscopy of the C_2H_2 molecule by Ne* (3^3P_2, 3^3P_0) metastable atoms 51
NiO
Resonant electron exchange scattering in late transition metal monoxides 211
Nitric oxide
Kinetic energy study of the ion fragments produced by dissociative photoionization of nitric oxide 109

Overlayer thickness determination
Influence of surface oxidation on the photoelectron diffraction intensities from InP single crystals 73

Penning ionization
Penning ionization electron spectroscopy of the C_2H_2 molecule by Ne* (3^3P_2, 3^3P_0) metastable atoms 51
Photoelectron
An experimental comparison of the total-electron-yield and conversion-electron-yield modes for near-surface characterization using X-ray excitation 81
Escape probability of signal photoelectrons from non-crystalline solids: influence of anisotropy of photo-emission 127
Photoelectron diffraction
Influence of surface oxidation on the photoelectron diffraction intensities from InP single crystals 73
Influence of photoelectron diffraction effects on the dichroism and spin polarization of non-magnetic surfaces 91
Photoelectron spectroscopy
Photoelectron spectroscopic study of X-ray induced reduction of CeO_2 121
Photoemission
Escape probability of signal photoelectrons from non-crystalline solids: influence of anisotropy of photo-emission 127
Probing depth
An experimental comparison of the total-electron-yield and conversion-electron-yield modes for near-surface characterization using X-ray excitation 81

Raman spectrum
Nitrogen 1s electron binding energy assignment in carbon nitride thin films with different structures 45
Relativity
Effects of relativity on the $KL_1L_2(^3P_0)$ Auger transition rate of $^{159}_{65}Tb$ 1
Resonance spectra
Resonant Auger spectra of open shell rubidium atom 253
Resonant scattering
Resonant electron exchange scattering in late transition metal monoxides 211
Rotational shift
Influence of photoelectron diffraction effects on the dichroism and spin polarization of non-magnetic surfaces 91
Rubidium
Resonant Auger spectra of open shell rubidium atom 253

Secondary electron
An experimental comparison of the total-electron-yield and conversion-electron-yield modes for near-surface characterization using X-ray excitation 81
Singular value decomposition
Molecular reorientation on liquid surfaces: a MIES study of pentadecane segregation in formamide 9
Slater integral
Calculation of Al and Si KLV Auger energies and intensities 187
Spectra
Resonant Auger decay in the $L_{2,3}$-MM spectrum of Ar excited by electron bombardment 203
Spin polarization
Influence of photoelectron diffraction effects on the dichroism and spin polarization of non-magnetic surfaces 91
Sulfur hexafluoride
State and site selectivity in SF_6 fragmentation studied via Auger electron–ion coincidence 169
Surface cleaning
Determination of the inelastic mean free path of electrons in GaAs and InP after surface cleaning by ion bombardment using elastic peak electron spectroscopy 177
Surface potent
Formation of thin oxide and sulphide films on polycrystalline molybdenum foils: characterization by XPS and surface potential variations 31
Synchrotron radiation
Kinetic energy study of the ion fragments produced by dissociative photoionization of nitric oxide 109

Thin films
Interface effects and the Auger parameter in titanium oxide thin films deposited on metals and in sandwich structures 61
TiO_2
Interface effects and the Auger parameter in titanium

oxide thin films deposited on metals and in sandwich structures 61
TiO_2-metal interfaces
Interface effects and the Auger parameter in titanium oxide thin films deposited on metals and in sandwich structures 61
Total electron yield
An experimental comparison of the total-electron-yield and conversion-electron-yield modes for near-surface characterization using X-ray excitation 81

Valence bands
Electronic structure of intercalated metal disulfide ($Fe_{1/4}TiS_2$) studied by XPS and theoretical calculations 19
Vibrational excitation cross section
Resonance mechanisms in electron energy loss spectra of stearic acid Langmuir–Blodgett monolayers revealed by isotopic effects 221

XPS
Electronic structure of intercalated metal disulfide ($Fe_{1/4}TiS_2$) studied by XPS and theoretical calculations 19
Formation of thin oxide and sulphide films on polycrystalline molybdenum foils: characterization by XPS and surface potential variations 31
Interface effects and the Auger parameter in titanium oxide thin films deposited on metals and in sandwich structures 61
Nitrogen 1s electron binding energy assignment in carbon nitride thin films with different structures 45
X-ray induced damage
Photoelectron spectroscopic study of X-ray induced reduction of CeO_2 121
X-ray photoemission spectroscopy
Spontaneously organized molecular assembly of an aromatic organic disulfide on silver/platinum alloy surfaces: an angle dependent X-ray photoemission investigation 101
